

HERKIMER-ONEIDA COUNTIES TRANSPORTATION COUNCIL

Annual Listing of Federally Obligated Projects for Federal Fiscal Year 2025

(OCTOBER 1, 2024 THROUGH SEPTEMBER 30, 2025)

PURPOSE

The Herkimer-Oneida Counties Transportation Council (HOCTC) Transportation Improvement Program (TIP) is a capital program for the timing and funding of all transportation improvements involving federal funds over at least four years for the HOCTC metropolitan planning area (Herkimer and Oneida Counties). Project schedules often change as a result of unexpected design challenges, personnel, contractor, or consultant availability, or due to changes in budget resource availability. Thus, the TIP does not yield an exact picture of actual project expenditures. Note: the latest TIP covers the years 2023-2027 and is available at www.HOCTC.org

Federal regulations require an Annual Listing of transportation projects, including investments in pedestrian walkways and bicycle facilities, for which federal funds have been obligated in the preceding year be made available for public review by the HOCTC as the Metropolitan Planning Organization (MPO). The listing must be consistent with the funding identified in the TIP.

PROJECT OBLIGATIONS

An obligation is the U.S. Department of Transportation's legal commitment to pay the federal share of a project's cost. Projects for which funds have been obligated are not necessarily initiated or completed in a given program year, and the amount of the obligation in a single year will not necessarily equal the project's total cost.

Obligations do not always indicate that work is underway. Project accounts are set up, particularly for the initial phases of a project to enable the work to start. It may take a while, for example, to select and hire a design consultant or obtain supplies necessary to begin work.

TIP projects are separated into highway and transit projects. Highway projects are funded through the Federal Highway Administration (FHWA) and transit projects by the Federal Transit Administration (FTA). The rules for the distribution and expenditure of the two fund types vary significantly. Therefore, they remain mostly apart during the planning process and thus in their presentation in the obligations list.

The list of obligated projects is organized and presented in a manner consistent with the TIP. The TIP identifies project costs and schedules by phase. These phases are:

- Scoping: This phase includes meetings with project developers and designers, local government representatives, and other involved parties. Decisions are made regarding specific elements that will be included in the project and the range of design alternatives that will be investigated.
- Preliminary Engineering: This phase includes basic engineering work on each alternative, traffic studies, environmental analyses, and other work specific to the project. Public outreach in accordance with state and federal requirements is used to gain community input on the project. A preferred alternative is selected to advance the project.
- Detailed Design: This phase includes detailed engineering work on the preferred alternative. This phase results in the plans and specifications that the construction contractor will work from.
- Right-of-Way Incidentals: This phase includes preparation work required prior to right-of-way acquisition.
- Right-of-Way Acquisition: This phase includes the acquisition of right-of-way (property) necessary to complete the project. Acquisition can be achieved through the purchase of property or an easement.
- Construction: This phase includes all work necessary to build the project.
- Construction Inspection: This phase includes ongoing inspection to ensure construction is performed properly and conforms to specifications.
- Other/Misc: This phase is usually associated with public transportation projects and involves the purchase and acquisition of vehicles and associated preventive maintenance, though in some cases, such as for station, parking, maintenance/storage facilities, and the construction of fixed or permanent facilities are undertaken. This phase includes funding for agency staff and/or contractors to perform work that supports the management and operation of the transportation system.

The following list identifies projects that had federal funds obligated during FFY 2025 (October 1, 2024 – September 30, 2025), the phases for which those funds were obligated, and include basic data about each project. Tables may reference HOCTC or HOCTS due to internally coded naming features that can not be changed to represent the January 1, 2021 name change.
